RE NXT (développeur)

PLAN DE FLOW CLOUD (POWER AUTOMATE)

MCHF - ApproveGift

Environnement « Équipe » · modifié le 12 nov. 2026, 22 h 18 · généré le 12 nov. 2026, 22 h 44 avec Établi

Avant de commencer

- Connexions nécessaires : OneDrive for Business, SharePoint.
- Liste SharePoint **MCHF Submissions** avec les mêmes colonnes que la liste du lab.
- Liste SharePoint **MCHF Fund Lines** avec les mêmes colonnes que la liste du lab.
- Liste SharePoint **MCHF - Audit documents** avec les mêmes colonnes que la liste du lab.
- Liste SharePoint **MCHF - Submission History** avec les mêmes colonnes que la liste du lab.
- Adresse du site SharePoint non indiquée : remplacez « https://VOTRE-ORGANISATION.sharepoint.com/sites/VOTRE-SITE » (paramètre Site Address) dans les actions SharePoint.
- **Record in NXT :** Run a Child Flow : après l'import, choisissez de nouveau le flow enfant (l'ID exporté est celui du lab). Dans Power Automate, le parent et l'enfant doivent être dans la même solution, et l'enfant doit utiliser « Use this connection » pour chaque connexion (Run only users).

Pour reconstruire le flow : Mes flux › Nouveau flux › Flux de cloud automatisé, puis ajoutez les étapes dans l'ordre ci-dessous. Renommez chaque action comme indiqué : les expressions y font référence (espaces remplacés par « _ »).

Déclencheur

0 **manual**
When Power Apps calls a flow (V2)

Entrée « SubmissionID » number, obligatoire

Étapes

1

Answer the app

Respond to a PowerApp or flow

Sortie « text »	started

2

Get submission

SharePoint — Get item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF Submissions
Id	`@{triggerBody()?['number']}`

3

Get fund lines

SharePoint — Get items

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF Fund Lines
Requête de filtre	`Submission_x0020_Reference eq '@{outputs('Get_submission')?['body/Title']}'`

4

Initialize variable

Initialize variable (Variables)

Nom (Name)	rows
Type	string
Valeur (Value)	(vide)

5

Initialize variable 2

Initialize variable (Variables)

Nom (Name)	total
Type	float
Valeur (Value)	0

6 **Each line**
Apply to each (Control)

Sélectionner une sortie des étapes précédentes

```
@outputs('Get_fund_lines')?['body/value']
```

6.1 **Append to string variable**
Append to string variable (Variables)

Entrées

```
{
  "name": "rows",
  "value": "<tr>
<td>@{items('Each_line')?['Title']}</td>
<td>@{items('Each_line')?['Amount']}</td></tr>"
}
```

6.2 **Increment variable**
Increment variable (Variables)

Entrées

```
{
  "name": "total",
  "value":
"@items('Each_line')?['Amount']"
}
```

7 ◇ **PDF Needed**
Condition (Control)

Condition `@empty(body('Get_submission')?['AuditPDF'])` **est égal à (is equal to)** true

Si oui (If yes)

7.1 </> **HTML**

Compose (Data Operation)

Entrées (Inputs)

```
<h1>Gift coding record</h1>
<p><strong>Submission reference:
</strong>
@{body('Get_submission')?
['Title']}</p>
@{if(empty(body('Get_submission')?
['Payment_x0020_Reference']), '',
concat('<p><strong>Payment
reference:</strong> ',
body('Get_submission')?
['Payment_x0020_Reference'],
'</p>'))}

<h2>Donor</h2>
<table>
<tr><td><strong>Constituent
ID</strong></td>
<td>@{body('Get_submission')?
['ConstituentID']}</td></tr>
<tr><td><strong>Constituent
name</strong></td>
<td>@{body('Get_submission')?
['ConstituentName']}</td></tr>
<tr><td><strong>Constituent system
ID</strong></td>
<td>@{body('Get_submission')?
['Constituent_x0020_System_x0020_I
']}</td></tr>
</table>

<h2>Gift</h2>
<table>
<tr><td><strong>Gift type</strong>
</td><td>@{body('Get_submission')?
['Gift_x0020_Type']}</td></tr>
<tr><td><strong>Payment
type</strong></td>

by</strong></td>
<td>@{body('Get_submission')?
['ApprovedByEmail']}</td></tr>
<tr><td><strong>Approved
at</strong></td>
<td>@{body('Get_submission')?
['ApprovedAt']}</td></tr>
</table>

<p>Generated at approval. The NXT
transfer result is not part of
this record.</p>
```

7.2 **Create HTML file**

OneDrive for Business — Create file

Chemin du dossier (Folder Path)	/MCHF-Audit
Nom du fichier (File Name)	`@{body('Get_submission')?['Title']}-@{formatDateTime(utcNow(), 'yyyyMMdd-HHmmss')}.html`
Contenu du fichier (File Content)	`@outputs('HTML')`

7.3 **Wait**

Delay (Schedule)

Nombre (Count)	1
Unité (Unit)	Minute

7.4 **To PDF**
OneDrive for Business — Convert file

Type cible (Target type)	PDF
Fichier (File)	`@outputs('Create_HTML_file')?['body/Id']`

7.5 **Create PDF file**
SharePoint — Create file

Adresse du site (Site Address)	Le site SharePoint de la liste
Chemin du dossier (Folder Path)	/MCHF - Audit documents
Nom du fichier (File Name)	`@{outputs('Create_HTML_file')?['body/NameNoExt']}.pdf`
Contenu du fichier (File Content)	`@body('To_PDF')`

7.6 **Get link**
SharePoint — Get file properties

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF - Audit documents
Id	`@outputs('Create_PDF_file')?['body/ItemId']`

7.7 **Save link**
SharePoint — Update item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF Submissions
Id	`@triggerBody()?['number']`
Ligne › AuditPDF	`@{outputs('Get_link')?['body/{Link}']}`

Si non (If no)

(aucune action)

8 **Record in NXT**

Run a Child Flow (Flows)

Flow enfant (Child Flow)	MCHF - Record gift in NXT
Entrée « number »	`@triggerBody()?['number']`

9 ◇ **Added**
Condition (Control)

Condition	`@body('Record_in_NXT')?['outcome']` **est égal à (is equal to)** success

- Exécuter après (run after) : « Record in NXT » a réussi ou a échoué ou a expiré

Si oui (If yes)

9.1 **Set added**
SharePoint — Update item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF Submissions
Id	`@triggerBody()?['number']`
Ligne › Status › Value	Added to NXT Batch

9.2 **History added**
SharePoint — Create item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF - Submission History
Ligne › SubmissionReference	`@outputs('Get_submission')?['body/Title']`
Ligne › FromStatus	Recording in Progress
Ligne › ToStatus	Added to NXT Batch
Ligne › ActorEmail	System
Ligne › Comment	`@{body('Record_in_NXT')?['detail']}`
Ligne › ActionAt	`@{utcNow()}`
Ligne › Title	Recording result

Si non (If no)

9.n1

Set failed

SharePoint — Update item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF Submissions
Id	`@triggerBody()?['number']`
Ligne › Status › Value	Transfer Failed

9.n2

History failed

SharePoint — Create item

Adresse du site (Site Address)	Le site SharePoint de la liste
Nom de la liste (List Name)	MCHF - Submission History
Ligne › Title	Recording result
Ligne › SubmissionReference	`@outputs('Get_submission')?['body/Title']`
Ligne › FromStatus	Recording in Progress
Ligne › ToStatus	Transfer Failed
Ligne › ActorEmail	System
Ligne › Comment	`@{coalesce(body('Record_in_NXT')?['detail'], 'The recording flow did not answer. Check the gift batch in NXT before any retry.')}`
